

# **Ambassadors**

**We have a challenge for you!**

## **Digital Game Design Challenge**

**Designs and ideas are ever changing so why not dive into the realm of digital game design? Make your own video game: plan, iterate, and share with us @gsnnj**

### **Supplies:**

- Pencil**
- Paper/Post-it notes**

### **Be a Digital Game Designer!**

- 1. Brainstorm your game scenario**
- 2. Create a G.I.R.L. avatar**
- 3. Learn about and create a decision tree for your game**
- 4. Design and iterate your game**
- 5. Share @gsnnj**

**What do you like most about your favorite videogame?**

**Is it the:**

**character?  
graphics?  
music?  
type of game?**

**Think about the aspects you like most and make it a reality.**

## Digital Game Design Challenge Explained

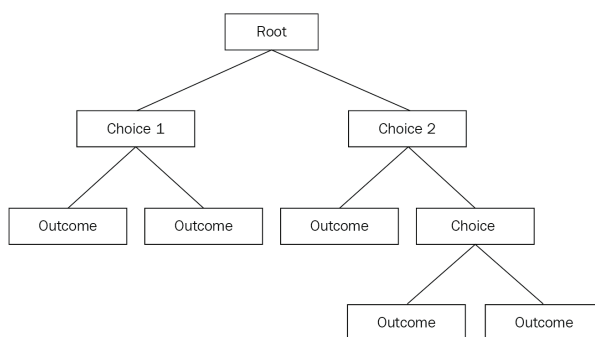

### 1. Character Creation

**Make your choice, the more descriptive and detailed you are the better:**

- Sketch your G.I.R.L. character(s) (avatar)
- Write up a character description with as many describing qualities.
- Include your character's personality traits:  
Shy, Innovator, Fearless etc.

### 2. Storyboard

- Draw up your ideas for your video game scenes.
- Layout you decision tree for your storyline.
- Helpful Hint: Use post-it notes or small pieces of paper to draw up your storyboard, it will save time when iterating.

### 3. Iteration

- Edit your storyboard where you see fit.
- Think about what music you would add to your video game. Music conveys emotion to your audience so choose wisely.
- Think about the color scheme of your game. Is it dark, light, or natural? Colors are also associated with feelings like red for anger and blue for sadness.
- What is the weather like in your game? Is it raining, snowing, sunny?
